Virginia and North Carolina Natural Gas Demand (in billion ft³/day)

Total natural gas demand in our region is estimated to rise at **3.5 percent** annually, **increasing nearly 165 percent** from 2010 to 2035.

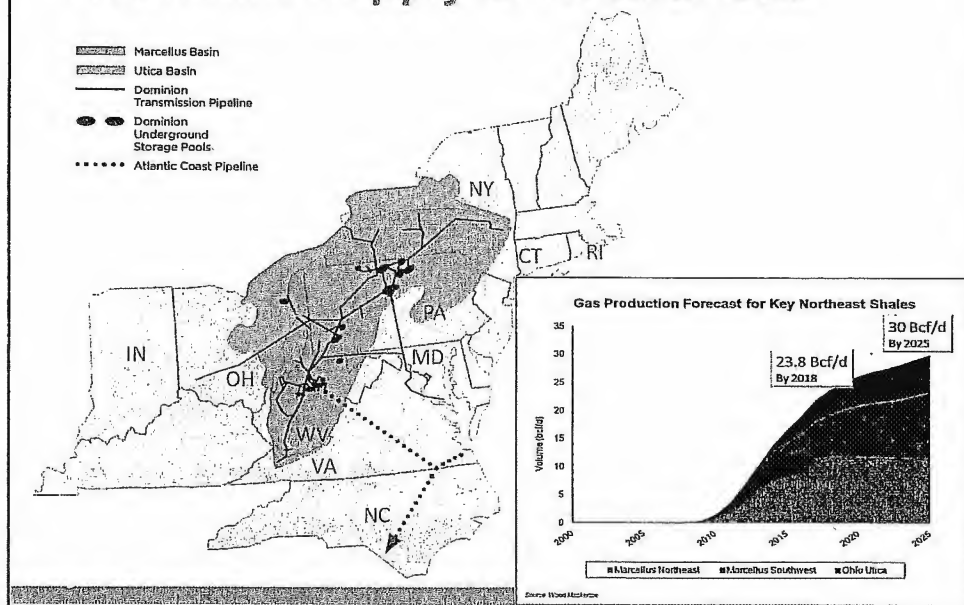

Source: The Economic Impacts of the Atlantic Coast Pipeline, ICF International, February 2015

By 2025, the U.S. Census Bureau predicts a population increase of:

- 1.8M in Virginia
- 2.1M in North Carolina

Pipeline

ACP Project Details

Length: Approximately 600 miles

Pipe: West Virginia: 42-inch diameter
Virginia: 42-inch diameter
North Carolina: 36-inch diameter
Secondary line: 20-inch diameter

Capacity: 1.5 billion cubic feet/day

Three compressor station locations:

1. Lewis County, West Virginia
2. Buckingham County, Virginia
3. Northampton County, North Carolina

Route: Dominion has collected data through surveys and consultations with landowners and other stakeholders to determine the best route with the least impact to the environment, and to historic and cultural resources.

Economic Analysis* North Carolina

200 miles of pipeline through eight counties

Total capital expenditures: **\$1.2 billion**

Construction

- ☐ Economic activity: \$680.2 million total
- ☐ Jobs: 4,426
- ☐ Local tax revenue: \$1.1 million annually

Operations

- ☐ Energy cost savings: \$134 million annually
- ☐ Economic activity: \$11.7 million annually
- ☐ Jobs: 925
- ☐ Local tax revenue: \$6 million annually

* Analysis provided by ICF International, Chmura Economics & Analysis, and Dominion Resources.

Atlantic
Coast
Pipeline

Tax Benefits to Northampton County

In 2022, the full value of the project will be reflected in tax payments estimated as follows

North Carolina counties (total for all)

- ☐ Miles of pipeline: 200
- ☐ Estimated 2022 property tax payments \$7.7 million

Northampton County

- ☐ Miles of pipeline: 22 + comp station
- ☐ Estimated 2022 property tax payments \$1.6 million

Atlantic
Coast
Pipeline

Tax Benefits to Halifax County

In 2022, the full value of the project will be reflected in tax payments estimated as follows

North Carolina counties (total for all)

- ☐ Miles of pipeline: 200
- ☐ Estimated 2022 property tax payments \$7.7 million

Halifax County

- ☐ Miles of pipeline: 24
- ☐ Estimated 2022 property tax payments \$762,500

Atlantic
Coast
Pipeline

Tax Benefits to Nash County

In 2022, the full value of the project will be reflected in tax payments estimated as follows

North Carolina counties (total for all)

- ☐ Miles of pipeline: 200
- ☐ Estimated 2022 property tax payments \$7.7 million

Nash County

- ☐ Miles of pipeline: 32
- ☐ Estimated 2022 property tax payments \$1 million

Atlantic
Coast
Pipeline

Tax Benefits to Wilson County

In 2022, the full value of the project will be reflected in tax payments estimated as follows

North Carolina counties (total for all)

- ☐ Miles of pipeline: 200
- ☐ Estimated 2022 property tax payments \$7.7 million

Wilson County

- ☐ Miles of pipeline: 12
- ☐ Estimated 2022 property tax payments \$406,500

Atlantic
Coast
Pipeline

Tax Benefits to Johnston County

In 2022, the full value of the project will be reflected in tax payments estimated as follows

North Carolina counties (total for all)

- ☐ Miles of pipeline: 200
- ☐ Estimated 2022 property tax payments \$7.7 million

Johnston County

- ☐ Miles of pipeline: 37
- ☐ Estimated 2022 property tax payments \$1.4 million

Atlantic
Coast
Pipeline

Tax Benefits to Cumberland County

In 2022, the full value of the project will be reflected in tax payments estimated as follows

North Carolina counties (total for all)

- ☐ Miles of pipeline: 194
- ☐ Estimated 2022 property tax payments \$6 million

Cumberland County

- ☐ Miles of pipeline: 38
- ☐ Estimated 2022 property tax payments \$1 million

Atlantic
Coast
Pipeline

Tax Benefits to Sampson County

In 2022, the full value of the project will be reflected in tax payments estimated as follows

North Carolina counties (total for all)

- ☐ Miles of pipeline: 200
- ☐ Estimated 2022 property tax payments \$7.7 million

Sampson County

- ☐ Miles of pipeline: 8
- ☐ Estimated 2022 property tax payments \$286,500

Atlantic
Coast
Pipeline

Tax Benefits to Robeson County

In 2022, the full value of the project will be reflected in tax payments estimated as follows

North Carolina counties (total for all)

- Miles of pipeline: 200
- Estimated 2022 property tax payments \$7.7 million

Robeson County

- Miles of pipeline: 22
- Estimated 2022 property tax payments \$891,500

Atlantic
Coast
Pipeline

Thorough & Exhaustive Process

- ▣ 3-year process
- ▣ 150,000+ pages submitted to agencies
- ▣ 60,000+ public comments
- ▣ 50+ public meetings
- ▣ 6,000+ miles of potential routes evaluated
- ▣ 300+ route adjustments
- ▣ Dozens of local, state & federal agencies

Atlantic
Coast
Pipeline

Progress Update

- Surveying: 98+ percent complete
- Easements: 70+ percent complete
- Pipe Production: 80 percent complete
- Land, materials & services: 85+ percent complete

Atlantic
Coast
Pipeline

Project Timeline

Atlantic
Coast
Pipeline

Special Considerations: Agriculture

- ❑ Pipeline has four feet of cover to allow planting/plowing
- ❑ Compensation rate of 200% for annual crop loss
- ❑ Valuation of construction impact on loss of timber, Christmas trees and vineyards under development
- ❑ Fencing, row crops, and livestock: all allowable uses of right-of-way

15

Atlantic
Coast
Pipeline

Special Considerations: Timber

- ❑ Typically, Dominion will purchase and take ownership of timber, unless another agreement has been reached with the landowner
- ❑ An independent 3rd party completes an inventory of the property
 - Evaluate by species and diameter
 - Provide current market value

20

Atlantic
Coast
Pipeline

Project Benefits

- ❑ Reliability and diversity of supply
- ❑ Cleaner air
- ❑ Economic development activity potential
- ❑ Economic activity during construction and operation
- ❑ Support growth of intermittent renewable power sources
- ❑ Employment opportunities
- ❑ Property tax revenues

21

Atlantic
Coast
Pipeline

Project Priority: Safety

- ❑ Rigorous federal and state testing protocols
- ❑ Pipeline welds are X-rayed
- ❑ Thorough inspections and pressure tests prior to operation

- ❑ Government-mandated operator qualification standards
- ❑ Community awareness programs
- ❑ Coordination with local emergency responders
- ❑ 24/7 monitoring from Dominion gas control center

Federal Energy Regulatory Commission Releases Favorable Environmental Report for the Atlantic Coast Pipeline

The following is a statement from Leslie Hartz, Dominion Energy's Vice President, Engineering & Construction, regarding the Final Environmental Statement for the Atlantic Coast Pipeline released today by the Federal Energy Regulatory Commission (FERC):

"The favorable environmental report released today provides a clear path for final approval of the Atlantic Coast Pipeline this fall. The report concludes that the project can be built safely and with minimal long-term impacts to the environment.

The report also reinforces previous findings by the FERC and decades of research demonstrating that natural gas pipelines do not adversely impact tourist economies or residential property values. With this report, the region moves one step closer toward a stronger economy, a more secure energy supply and a cleaner environment.

This report is the culmination of one of the most thorough and exhaustive environmental reviews that has ever been performed for a project of this scope.

The report is based on nearly three years of painstaking study by more than a dozen federal agencies, as well as extensive engagement with communities along the proposed route. Drawing on more than 150,000 pages of regulatory filings and more than 75,000 public comments, FERC's report comprehensively addresses all of the environmental and safety issues that have been raised. By any measure, this has been a rigorous and transparent process. It has provided extensive opportunities for public review and participation, and it has left no stone unturned.

As the report demonstrates, over the last three years we've taken unprecedented steps to protect environmental resources and minimize impacts on landowners.

We've made more than 300 route adjustments to avoid environmentally sensitive areas and protect important features of individual properties. We've adjusted the route to avoid wetlands, public and private drinking water sources, wildlife habitats, sensitive karst terrain, and many other environmental resources. In many areas of the project, we've adopted some of the most protective construction methods that have ever been used by the industry. While some impacts on the environment and landowners are unavoidable with any infrastructure project, the report demonstrates that we've taken all necessary steps to minimize those impacts and balance them with the urgent public need for the project.

The Atlantic Coast Pipeline is essential to the economic vitality, environmental health and energy security of our region. It will result in more economic opportunity, a cleaner environment, and lower energy bills for consumers and businesses. The project is urgently needed by public utilities in Virginia and North Carolina to generate cleaner electricity, heat homes and power local businesses. Public utilities in our region are depending on this project to meet the growing energy needs of the millions of customers they serve. With today's favorable report, we are confident we will receive final approval this fall and bring these important economic and environmental benefits to our region."

The Final Environmental Impact Statement is available for download on the [FERC website](#).
